

Monthly Report to Shareholders of the Optimal Japan Absolute Long Fund 14th February, 2006

	OJAL NAV*	Performance
27 January 2006	\$13.93	3.57 %

* Price is NAV after performance fee at the Fund level but is subject to equalisation at the investor level.

2006 has begun with a bang and, importantly – at least for derivatives traders - volatility is back. January's 3.7% rise in the Topix index obscures first a 5% decline to 18th January and then a 9% recovery from the 18th to the 31st. February has begun in a similar vein with Topix down 5.5% MTD as at the close on Feb. 13th with many of 2005's sectoral winners performing much worse than that. Shipping – a sector that we have long held dear – rose 48% in 2005 and a further 4% in January but has shed 13% in February. At its peak, shipping represented 8% of the Fund's NAV but we exited Kawasaki Shipping in late 2005 and sold the vast bulk of our stake in Mitsui OSK early in February so at the time of writing, our exposure had been cut back to less than 1%.

The consumer finance industry took a nasty broadside in January (-10.1%) as a higher court decision ruled that the exorbitant rates of interest they charge are in contravention of another finance law that limits the legal rate chargeable on unsecured consumer loans. We have always wondered why such a shady – but profitable - area has been tolerated (by the banks to begin with!) and felt that the sector could not warrant anything but a low multiple of earnings, so whilst not directly benefiting, we do not regard the share price slump in January with great dismay. The obvious distaste with which the giant Japanese city banks regard this highly profitable area of lending is especially unimpressive in our view and highlights a weakness in one of Japan's largest service sectors.

We do wish to reiterate that we are bullish on Japan. The economy, the attitude of company management, and a growing confidence in their (important) place in the world are all on the improve, and we expect a long period where our investments will prosper. The rise in stock prices in late 2005 however, was such that we feel a slow period is quite natural. Although it is always depressing to see prices fall in stocks we own, there is also a sense of relief that we are able to get a second bite at the cherry and accumulate bigger positions in those that we like. That is the sort of market we are in now – and it might be that way for a while yet.

To finish on an administrative matter, we wish to stress that any applications for redemptions or subscriptions in our funds that come in to HSBC Institutional Trust Services (Asia) after the dealing deadline will be rejected. Please visit our website www.optimalasia.com for related information and we encourage you to contact us through the web-site.
